

Make Music that Music Lovers Love

"I need more of those Dolby Atmos playlists—my ears are spoiled now!"*

-@mrdomingo5, Twitter

Dolby Atmos Music is the music that listeners ask for by name. It connects listeners with your music on a deep, meaningful level. Music lovers want to hear every note with clarity and precision. Now you can give them that—and more!

Hi-resolution quality
48kHz/24 bit and
96kHz/24 bit**

Fully immersive
3D sound

Up to 128 audio
objects can be
placed anywhere

Sonically superb sound with
unprecedented depth,
clarity, and immersion

Dolby Atmos makes musical magic possible**

Dolby Atmos mixes hitting a mainstream music service and in REAL ATMOS... this could be a game changer!! Finally, the major music providers are starting to stream multichannel and immersive."

-EricKalett, Quadraphonicquad.com forums

"I'm getting blown away by rediscovering albums I thought I really knew."

-unattributed in Dolby briefing document, page 7

"Classical music should be streamed in Dolby Atmos-quality (Tidal), and we should be able to choose between sound and video for live concerts (YouTube Music)."

-@ynygaard, Twitter

"Some of the Blue Note jazz music in Dolby Atmos sounds like you're at the club in the 1950s, despite the recording being 60 years old."

-No user name/source, from client document

"I'm truly losing my mind over listening to the Dolby Atmos versions of some of my favourite songs of all time on Tidal with these headphones. Literally hearing instruments and vocals I've never heard before!"

-No user name, page 8 of Dolby Briefing document

Dolby Atmos Music is easy, everywhere, and engaging

Dolby Atmos Music is the best choice for producing tracks that really stand out and connect with listeners.

- ✓ Preserves creative intent
