

Easy, immersive audio everywhere

Dolby Atmos is available on multiple devices

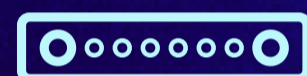

from in-home devices to on-the-go tablets and smartphones

From immersive surround sound systems to smartphones and everything in between, there is a device enabled with Dolby Atmos wherever you are

upward-firing speakers

upfiring on soundbars

virtualised sound on TVs, soundbars, laptops, and smart speakers

binaural tech on headphones for mobile devices, laptops, and tablets

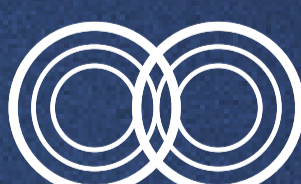

Simple and compact, the virtualised Dolby Atmos experience gives a big sound no matter the device

Dolby Atmos uses binaural processing to give you an immersive and personalised experience

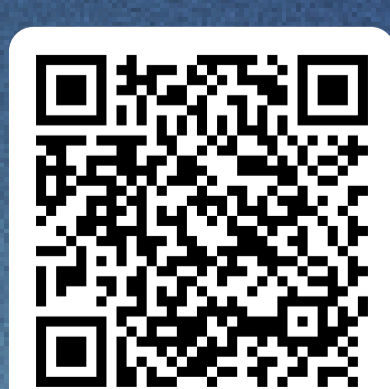

Tablets and laptops let you share Dolby Atmos with friends and family anywhere you go

Enjoy Dolby Atmos throughout your home using the smart speaker or digital assistant of your choice
