

Easy, immersive audio everywhere

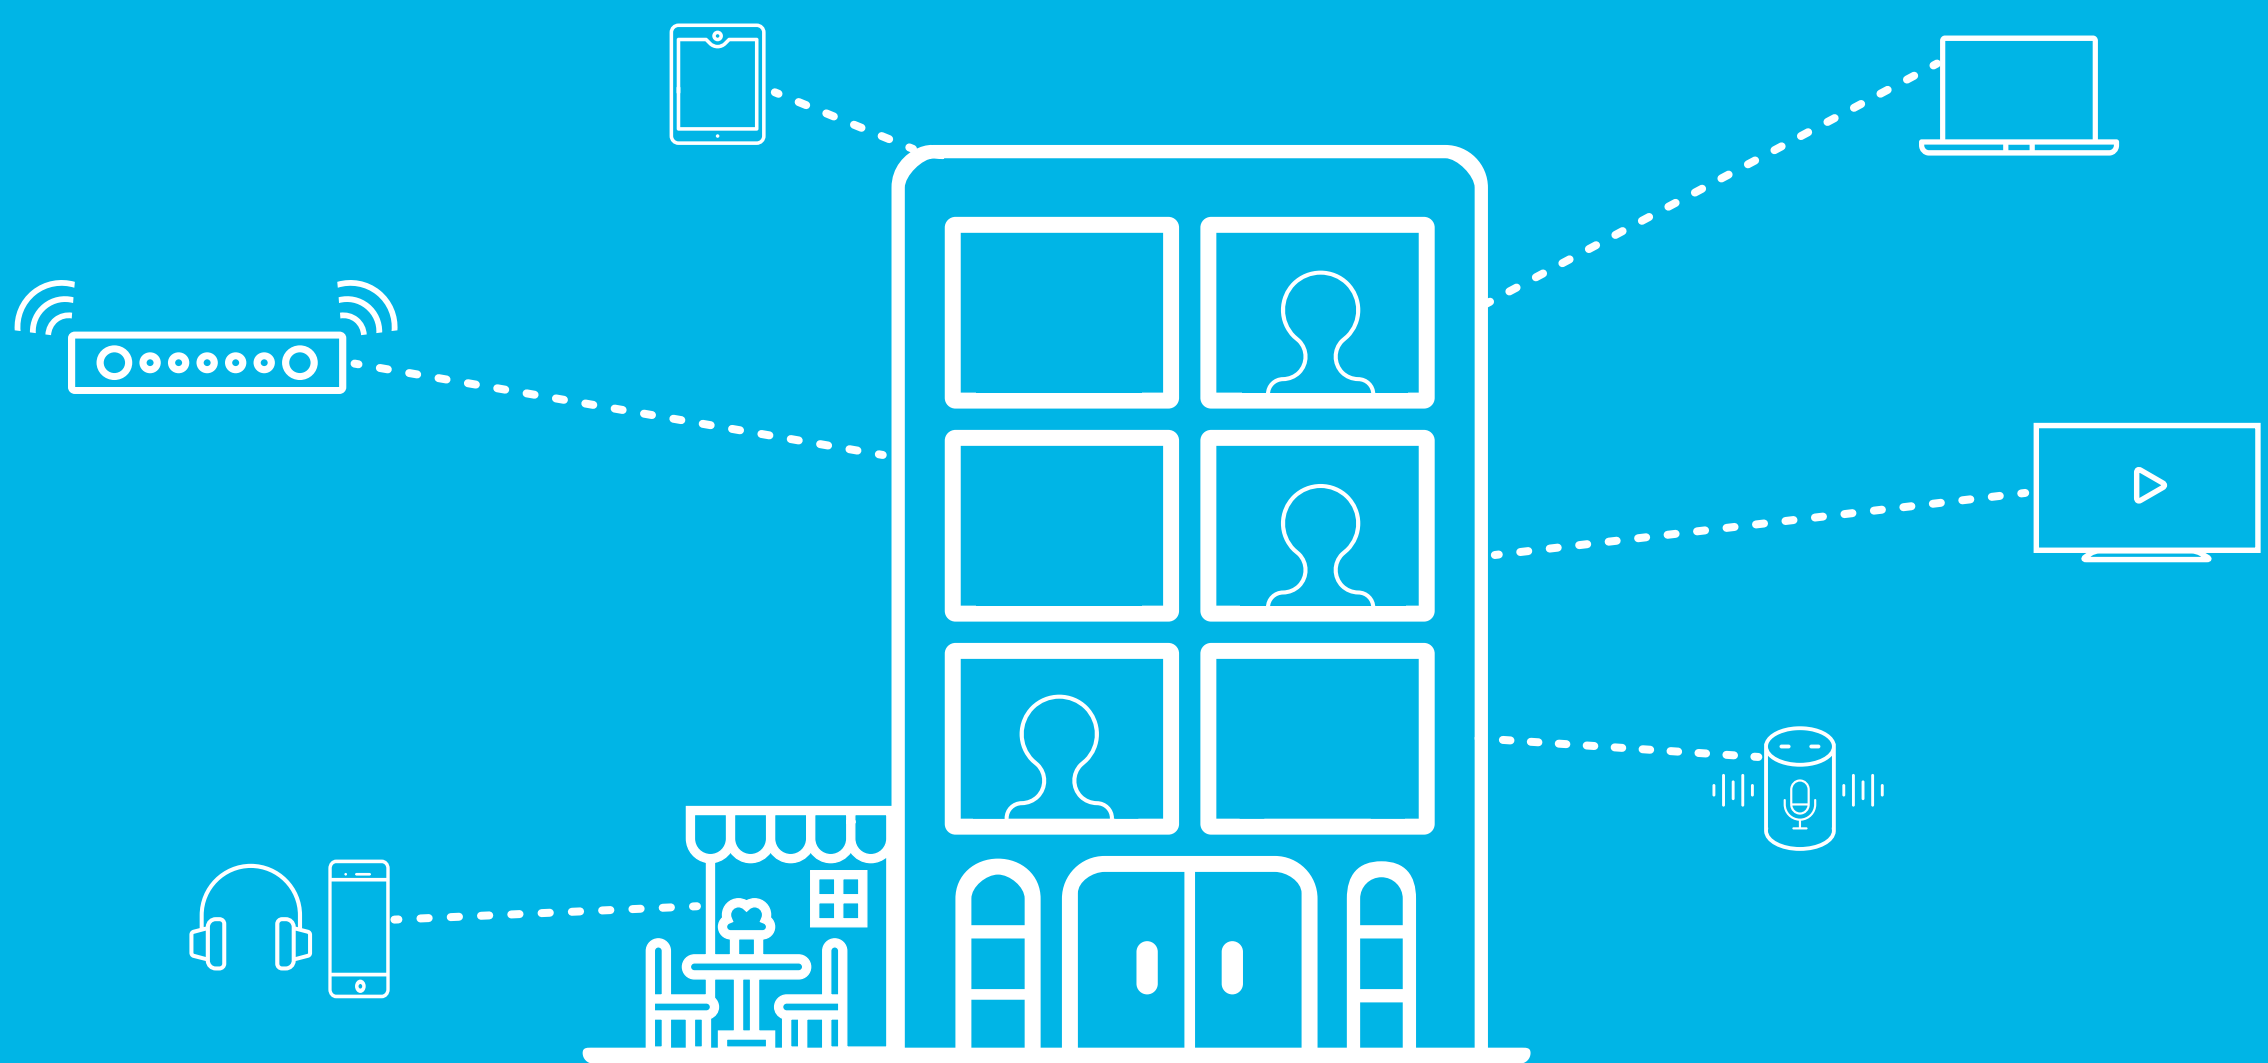

Dolby Atmos is available on multiple devices

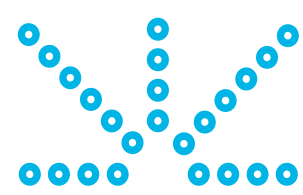

from in-home devices to on-the-go tablets and smartphones

Dolby Atmos goes wherever your audience goes

From surround, immersive sound systems to smartphones and everything in between, there is a device enabled with Dolby Atmos for any place you are

Dolby Atmos can be delivered using*

upward-firing speakers

upfiring on soundbars

virtualised sound on TVs, soundbars, laptops, and smart speakers

binaural tech on headphones for mobile devices, laptops, and tablets

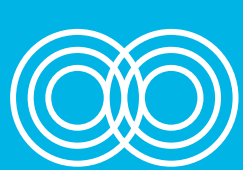

Simple and compact, the virtualised Dolby Atmos experience gives a big sound no matter the size of the room

Dolby Atmos uses binaural processing to give you an immersive and personalised experience

Tablets and laptops let you share Dolby Atmos with friends and family anywhere you go

Enjoy Dolby Atmos throughout your home using the smart speaker or digital assistant of your choice
