It's not all in your head: Dolby Vision drives decision making

“

I prefer to watch shows in 4K HDR with that Dolby Vision for my Disney+ shows and movies. **Nothing compares in colour.**

I think it's **Dolby Vision that makes the difference.** The way light interacts with every scene is so interesting.

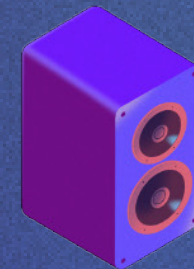

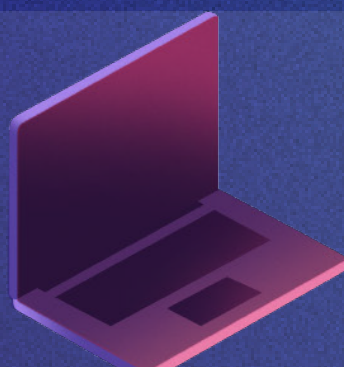

Dolby Vision just makes EVERYTHING look better on TV. **These colours are poppin'!**

At episode 7 of Wednesday and **WOW this is such a high quality,** both the Dolby Vision aspect of it and the animations! The colours are popping off.

Dolby Vision is incredible! I wish more games had it.
